

Muhabbat Ali

Software Engineer | Seeking Remote Position

✉ muhabbat.ali@epita.fr 📞 +33605908839 📍 Paris, France 🌐 muhabbat-ali 🔗 muhabbat.dev

A Full-Stack developer with 5 years of experience. I am proficient in technologies like MERN Stack, LAMP Stack, JavaScript frameworks, and Agile methodologies. I'm passionate about DevOps Engineering and Cloud Computing. I love to work on tools like Docker, Terraform, Kubernetes, Ansible, CI/CD pipelines, and Azure Cloud. Currently, I'm about to finish my master's in computer science with a specialisation in Software Engineering at EPITA, France and looking for a remote job.

EDUCATION

École Pour l'Informatique et les Techniques Avancées (EPITA),
Master of Computer Science - Software Engineering

2025 – 2026 (Continue)
Paris, France

EXPERIENCE

Software Engineer, Arbisoft

09/22–12/24 | Lahore, Pakistan

I joined Arbisoft and worked there for more than 2 years after graduating. At Arbisoft, I

- Developed and managed multiple projects, including e-commerce platforms, SaaS applications, and medical software, ensuring scalability and security.
- Led a team of 4 developers, mentored the team in best coding practices in ReactJS, NextJS and architectural decisions.
- Designed and implemented microservices-based architectures, improving performance and maintainability.
- Applied advanced skills in software development to deliver efficient, high-quality applications tailored to diverse business needs.

Full Stack Developer, Freelance

09/20 – Present | Remote

I also work as a part-time freelancer on Fiverr and Upwork. I have worked with many long-term clients and agencies. I have worked on 20+ projects and delivered 100+ web development-related tasks. These are my top Clients.

TheArtPeople (12/2021 - 08/2025)

- Worked as a freelance full-stack developer.
- Delivered 6+ web applications and 1 mobile app.
- Worked on technologies like HTML, CSS, JavaScript, ReactJS, NodeJS, Laravel, Supabase, and Flutter. Git, Github Actions, Cloudflare, and cPanel.

Whaaat Studio (06/2021 - 10/2021)

- I worked as a backend developer with Whaaat Studio.
- Implemented the backend functionalities for their projects.
- Worked on technologies like React.js, Firebase, Node.js, Elasticsearch, and Kibana.

MarketAction (10/2022- 12/2022)

- Worked as a Full Stack developer with this US- based startup.
- Worked on a FinTech application as a backend developer.
- Worked on technologies like Node.js, Discord Bot API, Google NLP, and TD Ameritrade API.

SKILLS

Programming: JavaScript, PHP, Dart

Web Technologies: HTML/CSS, ReactJS, Next.js, Laravel, Nest.js

Database: PostgreSQL, MongoDB, Cloud Firestore

Cloud/DevOps: AWS, Azure, Docker, Terraform, Ansible, Jenkins, Kubernetes

Soft Skills: Problem Solving, Adaptable, Continuous Learning, Time Management, Collaboration

Other: GitHub, Cloudflare, Slack, Flutter, N8N, Firebase, Elastic Stack, Bash scripting

Projects

Medplum Stack Deployment 09/2025 – 11/2025

I completed this project for a course at EPITA where I deployed an open source microservice-based project (Medplum) on Azure Cloud using the DevOps approach. While working on this project, I

- Created the cloud infrastructure using terraform, ansible, bash scripting, and Azure CLI.
- Gained hands-on experience on Kubernetes, Azure Container Registry, DNS, VPC, Security Groups, IAM, Storage, and VMSS etc.

Towkay Exchange 04/2024 – 12/2024

I created this app for a client from Singapore, it's a marketplace app for buying and selling where the user can post, search and buy listings like services, events, and businesses etc.

Technologies : Flutter, Supabase, Node.js, PostgreSQL, Stripe, Flutter BLOC,

Motionlayer 04/2024 – 12/2024

Motionlayer is an MVP clone of galshir.com/float app. Users can convert multiple layers of an image into animations and download the animation as a video format.

Technologies: React.js, PHP, MySQL, cPanel, Fabric.js, Redux, React Query.

Augle.io 04/2024 – 12/2024

It's an Augmented Reality + 3D editor web app. Users can set up a 3D scene, Render the created scene on the user's mobile screen using QR scan.

Technologies: React.js, Firebase, WebAR/XR, ARJS, Three.js, react-three-fiber.
